The TRAVELERS INSURANCE COMPANY of Hartford, Conn., was organized and commenced the business of insurance against accidents in April, 1864—eleven years ago this month. It was the first company to successfully establish this branch of insurance, and is now not only the oldest, and best accident insurance company in America, but the largest in the world—having assets of three and one quarter millions.

The TRAVELERS insures against general accidents—not accidents of travel only, but the thousand and one emergencies to which men are exposed in their lawful pursuits. It issues policies for the year or month, which are written without delay by any authorized agent. It insures men of all occupations and professions, between the ages of 18 and 65, at premiums which are graduated by the occupation and exposure. The rates are low, varying from \$5 to \$10 a year for each \$1,000 insured (for occupations not classed as hazardous), covering both fatal and non-fatal disabling injuries, as may be seen by table of rates below.

The TRAVELERS invites attention to the very large number of losses actually paid (\$21,500), to the large amount disbursed in cash benefits to its policy-holders (over \$2,000,000), averaging *seventeen hundred dollars a day* for every working day since the Company began business, and especially to the small cost in proportion to the possible benefits.

In the next two columns we give about two hundred examples of indemnity losses paid—the amounts paid varying not only in proportion to the time of disability, but to the amount insured, the scale of indemnity being five dollars per week for each \$1,000 insured (for occupations not classed as hazardous), covering both fatal and non-fatal disabling injuries, as may be seen by table of rates below.

To print the entire list of losses paid by THE TRAVELERS would require two hundred and fifteen columns of THE TRIBUNE.
